BRACCHI
Logistics

About us

Our offer ranges from exceptional transports to fashion logistics, from e-commerce distribution to industrial supply chains.

Bracchi is among **Europe's leading transport and logistics operators** with unique expertise in the industry, boasting a solid and historic positioning in highly specialised niche segments.

We guarantee an integrated and tailor-made offer covering the **entire logistics value chain**. We offer highly differentiated value-added services, thanks to an experienced and growing team with strong motivation and experience in the field.

Innovation, safety, quality and sustainability are the cardinal points of the group.

Our Values

INNOVATION

We look to the future to offer our customers state-of-the-art solutions. Thanks to continuous investment in growth and market analysis, we are able to anticipate and meet the needs of our customers.

ETHICS

The issues of safety, gender equality, contractual ethics and environmental sustainability are central to Bracchi. An independent Supervisory Board oversees corporate governance.

PASSION

Our success is based on people: a highly qualified team of professionals who work every day with passion and strong team spirit. Daily activities are guided by dedication, enthusiasm, collaboration and proactivity.

Our mission

Our aim is to ensure a **comprehensive offer of transport and logistics solutions**. Customer requirements are at the centre of our commitment, with a view to constant improvement.

Every day we put our passion at stake in order to **guarantee a personalized service**, with a flexible, listening and result-oriented offer.

Every milestone represents a new starting point for us. We grow for our customers and with our customers, in **constant progress in terms of training, technology and efficiency**.

Our strengths

- Premium, diversified clients portfolio with unique **long-standing relationships**.
- Key position in **Italy and other European countries**.
- **Loyal client base** that demonstrates the quality of transport and logistics services provided over time.
- Ability to **quickly replicate and customise service** models according to the needs of new customers.
- Specialisation in niche segments that require **strong expertise and agility**.
- Possibility of **geographic cross-selling** with customers operating in different countries.

KEY END MARKETS

ELECTROMECHANICAL

We develop innovative logistics and transport solutions for the engineering, electronics and automotive sectors.

AGRICULTURAL

Tailor-made solutions for the storage and distribution of agricultural vehicles.

ELEVATOR

Innovative solutions for logistics and transport dedicated to the elevator sector.

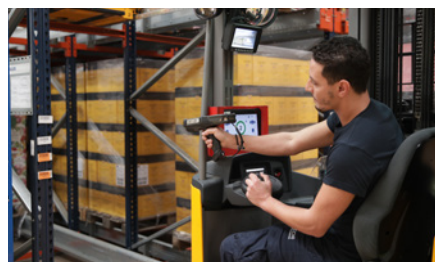

BEAUTY & HEALTHCARE

We are a trusted partner for companies in the cosmetics, beauty and healthcare sectors.

FASHION

Innovative logistics and transport solutions dedicated to the fashion, footwear and clothing sectors.

FOOD & BEVERAGE

We provide our experience to meet all logistics and transport needs for the Food & Beverage sector.

E-COMMERCE

Rely on an experienced partner to handle your e-commerce orders efficiently and on time.

CONSUMER GOODS

We offer the best logistics solutions for the production and sale of consumer goods.

ORIGINS

The Beginning of the Journey

Founded in 1928 as a local transport company, Bracchi gradually established itself in the market thanks to tailor-made, high value-added services. During the 1970s, the Company expanded its presence across Italy, becoming a key partner in specialized sectors, and in the 1980s it extended its operations throughout Europe.

2018

From Fashion to Exceptional Transport

In 2018, through the acquisition of **BAS Group** (Basped, Logisticnet, Il Corriere, Truckpooling), the Company expanded its range of services into new business areas such as fashion, e-commerce, cosmetics, and food & beverage. In 2020, Bracchi acquired **Trasporti Peterlini**, a company based in Sorbolo (Parma) specialized in heavy and exceptional transport.

1990s

Integrated Logistics

Bracchi expanded its service portfolio by developing outsourcing projects and integrated logistics solutions. In 1994, the Company inaugurated its new **headquarters in Fara Gera d'Adda** and extended its European network to include both maritime and air transport services. In 1997, Bracchi opened its **first international branch in Lublin (Poland)**, which today serves as a key hub for managing traffic flows across Eastern Europe.

2023

A More Sustainable Direction

In 2023, **Argos Climate Action** announced its entry into the Company with a majority stake. At the core of the project is a decarbonization plan aimed at reducing emissions by 33% over five years. ANIMA Sgr and Clessidra Capital Credit co-invested in the transaction. Two state-of-the-art logistics hubs certified LEED Gold were inaugurated in **Castrezzato** (Brescia) and **Lonigo** (Vicenza).

2010s

An International Dimension

Bracchi strengthened its international presence with the opening of its first **Slovak hub in Levice**, dedicated to technical logistics and consumer goods. In 2015, the Company inaugurated its **German branch in Ettenheim**, a 44,000-sqm high-tech facility serving the elevator industry. The expansion in Slovakia continued with the launch of the new **Kostolné Kračany hub**, a 65,000-sqm facility dedicated to standard and integrated logistics for strategic clients.

TODAY

The Journey Continues

In 2024, the acquisition of **Mateco S.p.A.**, a long-established company specializing in transport exceeding 200 tons, was completed. In 2026, the new **Cittadella (PD) Hub**, one of the largest in Italy, was inaugurated, featuring 84,000 square meters and 82 loading bays, and certified BREEAM Excellent. Also in 2026, with the acquisition of the **German company Rostock Trans**, a leading operator in complex heavy transport, particularly in the wind energy sector, Bracchi further strengthened its specialization in special and complex transport.

ENVIRONMENT

A strategic decarbonisation plan at the heart of our project

The 2024-2028 Decarbonization Plan outlines an ambitious goal of achieving a **33% reduction in greenhouse gas emissions by 2028**.

This goal will be achieved by intervening in the **Scope 1, Scope 2, and Scope 3 areas identified by the Greenhouse Gas Protocol** (GHG Protocol), finding innovative solutions for efficient and ecological logistics and transport management.

KEY ACTIONS:

- Continuous fleet renewal
- Adoption of innovative fuels
- Activation and installation of photovoltaic panels
- Purchase of renewable energy
- Led lighting
- Packaging rationalization
- Waste recovery
- Green procurement: selection and awareness of suppliers

SOCIAL

At Bracchi, we recognize that our **employees are our most valuable asset**. From offering competitive benefits and flexible work arrangements to **promoting diversity and inclusion**, we strive to create a supportive and inclusive workplace where everyone can thrive.

KEY ACTIONS:

- Fair pay and living wages
- Equal employment opportunity
- Employee benefits
- Workplace health and safety
- Community engagement
- Responsible partnerships
- Adhering to labour laws

OUR COMMITMENT TO GENDER EQUALITY

Bracchi is committed to **reducing the gender gap**, aiming for a horizon in which women will play an increasingly prominent role, also in the transport and logistics sector.

GOVERNANCE

Our principles: integrity, accountability, compliance

At Bracchi, we are aware of the crucial importance of governance in ensuring transparency, accountability and ethical conduct. **Our commitment to Corporate Governance Responsibility (CGR)** is unwavering and guides our decisions and actions as we navigate the complexities of the modern corporate landscape.

KEY ACTIONS:

- CORPORATE GOVERNANCE
- RISK MANAGEMENT
- COMPLIANCE
- ETHICAL BUSINESS PRACTICES
- AVOIDANCE OF CONFLICTS OF INTEREST
- ACCOUNTING INTEGRITY AND TRANSPARENCY

**INDEPENDENT
SUPERVISORY
BODY**

To meet the challenges associated with the progressive growth of the company, **a corporate governance has been implemented at Bracchi, guaranteed by an organisation, management and control model**, which monitors compliance with contractual ethics, safety and environmental policies. The “model” was prepared to make Bracchi employees and collaborators aware of the need to follow correct and straightforward behaviour.

Argos Climate Action Fund announced on December 15, 2023, that it has acquired a majority stake in Bracchi.

The goal is to position Bracchi at the forefront of the industry in terms of green offerings, implementing a clear decarbonization strategy.

In 2023, we measured our carbon footprint based on Scopes 1, 2, and 3 of the GHG Protocol:

Scope 1: 11%

Scope 2: 1%

Scope 3: 88%

Carbon Footprint Overview 2023

TOTAL
EMISSIONS

79.347
tCO₂eq

CARBON
INTENSITY

395
tCO₂eq /
MIO EUR

Key points of the strategy

Transform Bracchi into a **leader in sustainable logistics** and transportation.

Meet the challenge of customers who are accelerating **emissions reductions**.

Adopt a range of initiatives: from alternative fuels to **energy efficiency**.

Strong commitment from management to accelerate the **ecological transition**.

Decarbonization path as an additional contribution to **expected EBITDA**.

The Decarbonization Plan sets the ambitious goal of a **33% reduction in emissions by 2028!**

-7,5%

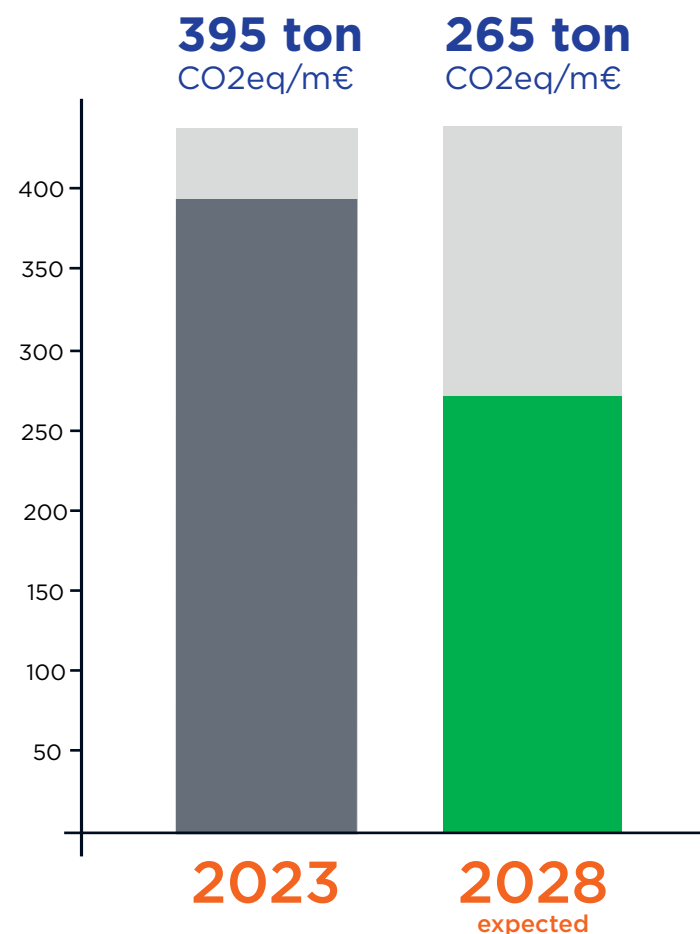

Reduction* of
Greenhouse Gases
emissions intensity,
on annual basis.

-33%

Reduction* of
Greenhouse Gases
emissions intensity,
consolidated,
2024-2028.

**on an annual basis vs. baseline, when Plan interventions are fully deployed.*

The projected pathway of our Carbon Footprint

KEY INITIATIVES

SCOPE 1

Transition of the company-owned fleet to **HVO fuel**.

Transition of the corporate car fleet to **HVO fuel**.

SCOPE 2

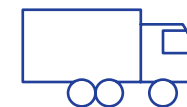

On-site **Solar Photovoltaic (PV)** System Installation.

Procurement of **Renewable Energy**.

LED Lighting System Upgrade.

SCOPE 3

Green procurement for transport and distribution.

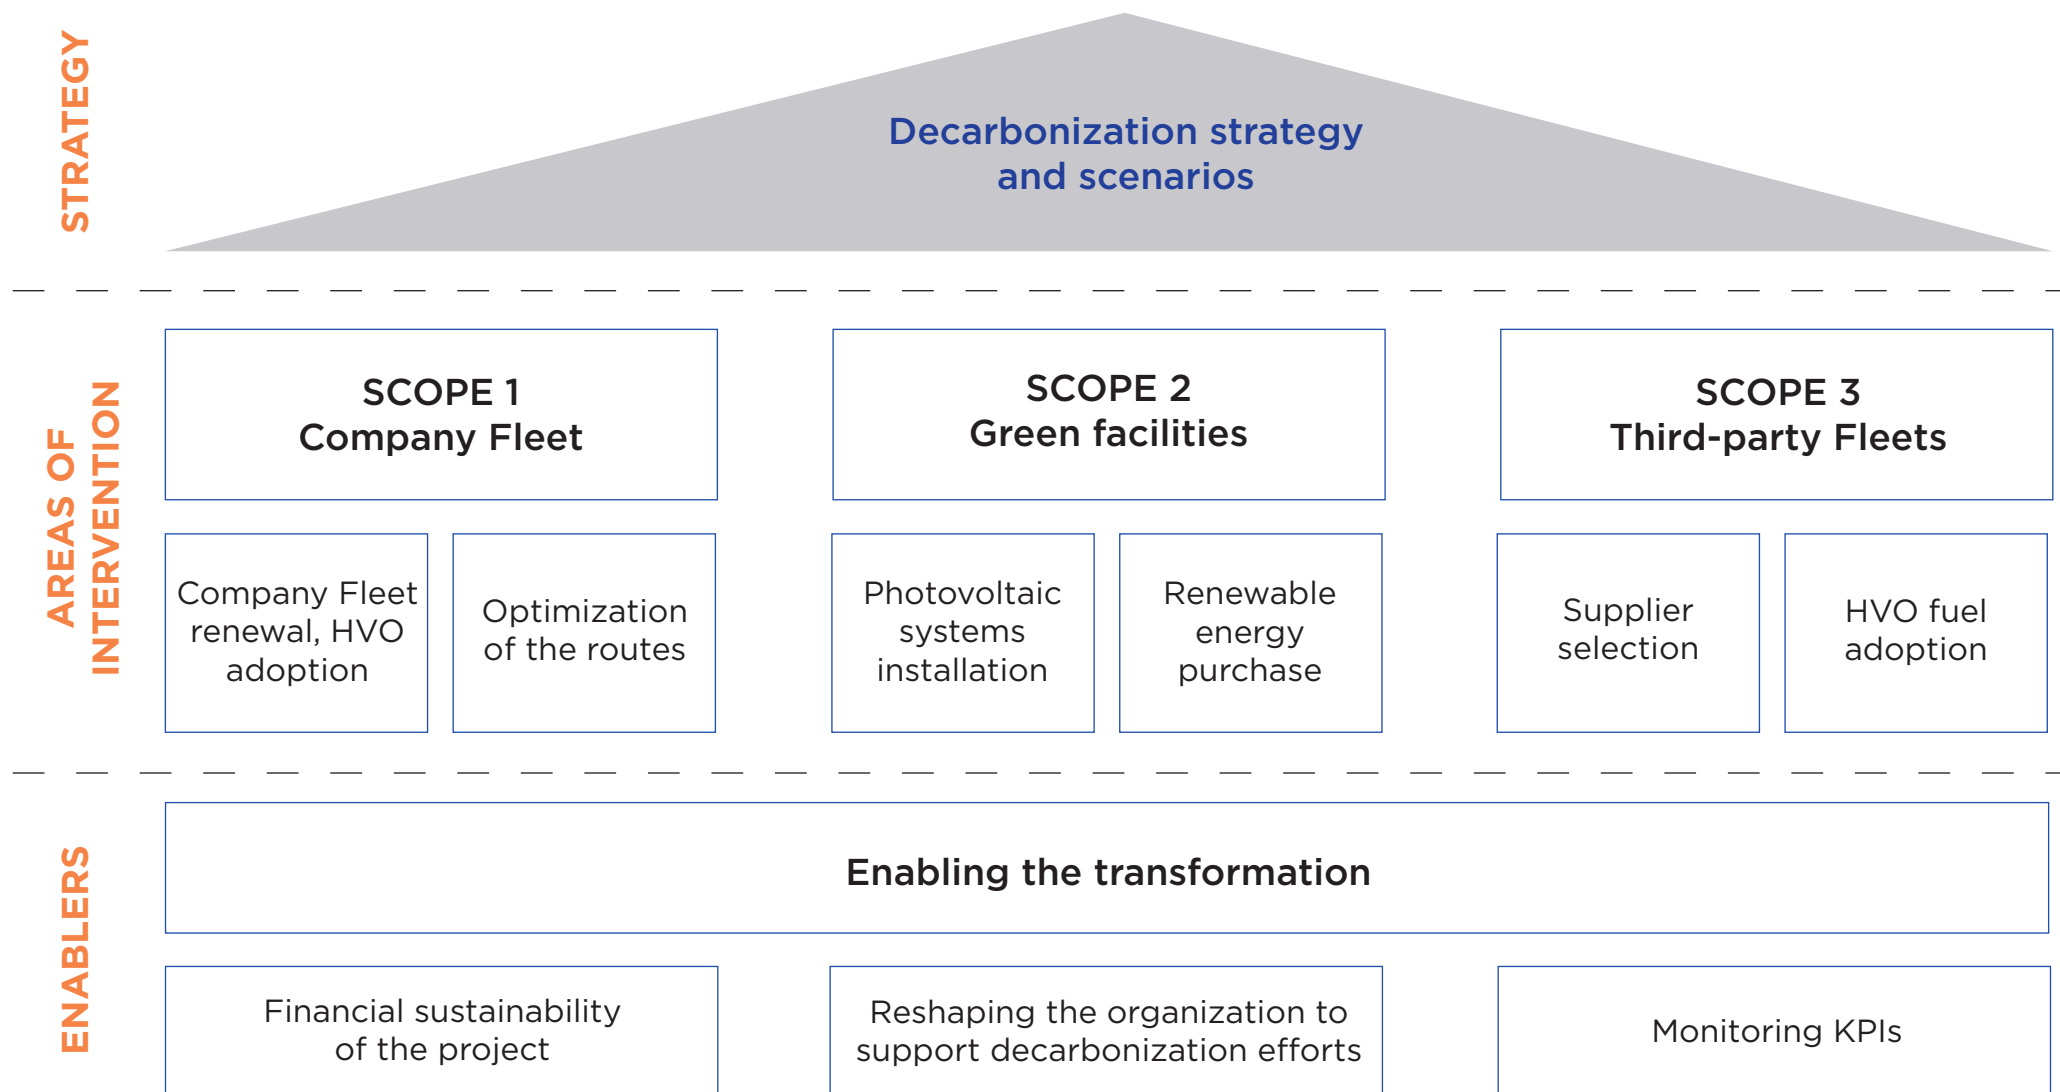

Progressive adoption of **HVO fuel** on third party trucks.

EMISSIONS WILL BE REDUCED BY **74%***

EMISSIONS WILL BE REDUCED BY **32%***

**on an annual basis vs. baseline, when Plan interventions are fully deployed.*

SAFETY & CERTIFICATIONS

The certifications obtained by the Group demonstrate a concrete commitment to management excellence, operational safety, and supply-chain sustainability.

Issued by independent third-party bodies, they support the Company in its continuous improvement process and assist governance in risk management, ensuring transparency and compliance with international standards.

Below are the Group's main certifications:

**UNI EN ISO
9001:2015**

Through the implementation of its **Quality Management System**, Bracchi promotes the continuous improvement of its business processes with the aim of ensuring and maintaining customer satisfaction, strengthening customer loyalty, acquiring new clients, and supporting business growth.

**UNI EN ISO
45001:2023**

For Bracchi, **workplace safety and the health** of its employees represent primary and non-negotiable values. The Company ensures regulatory compliance and adherence to safety rules and procedures through an effective system of controls, both documental and on-site, supported by formal delegations and a clear definition of roles and responsibilities. This approach involves not only top management but all employees, at every level, as well as third-party companies operating on behalf of Bracchi. A central priority for Management is ensuring that every employee returns home safely to their families.

**UNI EN ISO
14001:2015**

Bracchi has always been attentive to **environmental issues** and to the monitoring of the environmental impacts associated with its services. This commitment is reflected in the identification and assessment of the Company's environmental aspects and impacts, as well as in the definition of a progressive improvement plan. Bracchi has also embraced the 2030 Agenda for Sustainable Development, recognizing the strategic relevance of its goals as a framework for building a more equitable and sustainable future.

**UNI PDR
125:2022**

In 2025, Bracchi obtained the **Gender Equality Certification**, supporting and demonstrating a structured path that promotes sustainability, equity, and inclusion. This achievement is not merely symbolic; it represents the evolution of a comprehensive program aimed at fostering an organizational culture based on respect, equal opportunities, and the enhancement of talent in all its forms.

Bracchi is a **certified IATA** (International Air Transport Association) agent; it provides air transport services to and from all continents, including the handling and shipment of dangerous goods subject to ADR regulations.

ECOVADIS Certification/Rating

Bracchi has obtained the EcoVadis Certification with the aim of differentiating itself from competitors, managing and reducing risks, and identifying and monitoring its key environmental, social, and ethical areas. At the same time, the certification helps mitigate reputational and operational risks. This recognition also ensures full regulatory compliance, enhances corporate performance, and strengthens the trust of stakeholders, partners, and customers by demonstrating a concrete commitment to sustainability.

ICT INFRASTRUCTURE CAPABILITIES

Bracchi has all the **most advanced ICT systems**, an IT infrastructure developed to the highest standards of **efficiency, security and business continuity**.

TRACKING SERVICES

Our **track & trace system** allows clients to have immediate visibility of the position of goods and to follow all the steps from the pick-up point to the final destination. business.

TMS

Transportation Management System designed and developed specifically for our needs, updated regularly and following the needs of the business.

WMS

Custom developed **Warehouse Management System**. Designed to manage all warehouse operations, in different product areas, to ensure efficiency, accuracy and agility.

CLOUD COMPUTING

In 2023, we completed the migration of all corporate IT systems to cloud computing: applications, remote desktops, network folders.

LOGISTICS INTEGRATIONS

Seeburger to connect effectively to any customer ERP. Connectors with major international courier services

CONNECTIVITY CONTINUITY

Dual data network (fibre, satellite) to ensure continuity of service.

CYBER SECURITY

Ongoing in-house training and adoption of the highest security standards.

DEDICATED CUSTOMER SERVICE

Recognizing the high demands of the industrial and technical world, both in terms of quality and transport safety, we have structured a **customer service department specializing in special and heavy transport.**

Our Control Tower is made up of dedicated teams responsible for providing immediate assistance and support to each customer.

Our goal is to guide the client throughout the entire delivery planning, assisting them in finding and utilizing the appropriate resources to achieve the best possible transportation service.

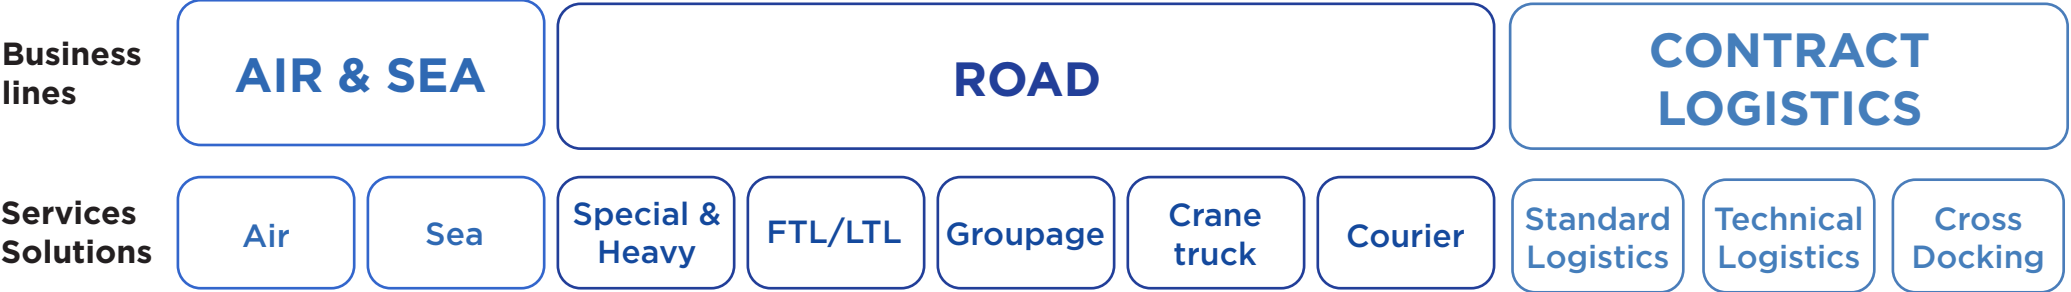

- **CONTINUOUSLY MONITOR CUSTOMER SATISFACTION**
- **HAVE A PROACTIVE VISION OF CUSTOMER NEEDS**
- **INTERVENE IMMEDIATELY IN EMERGENCY RESOLUTION**

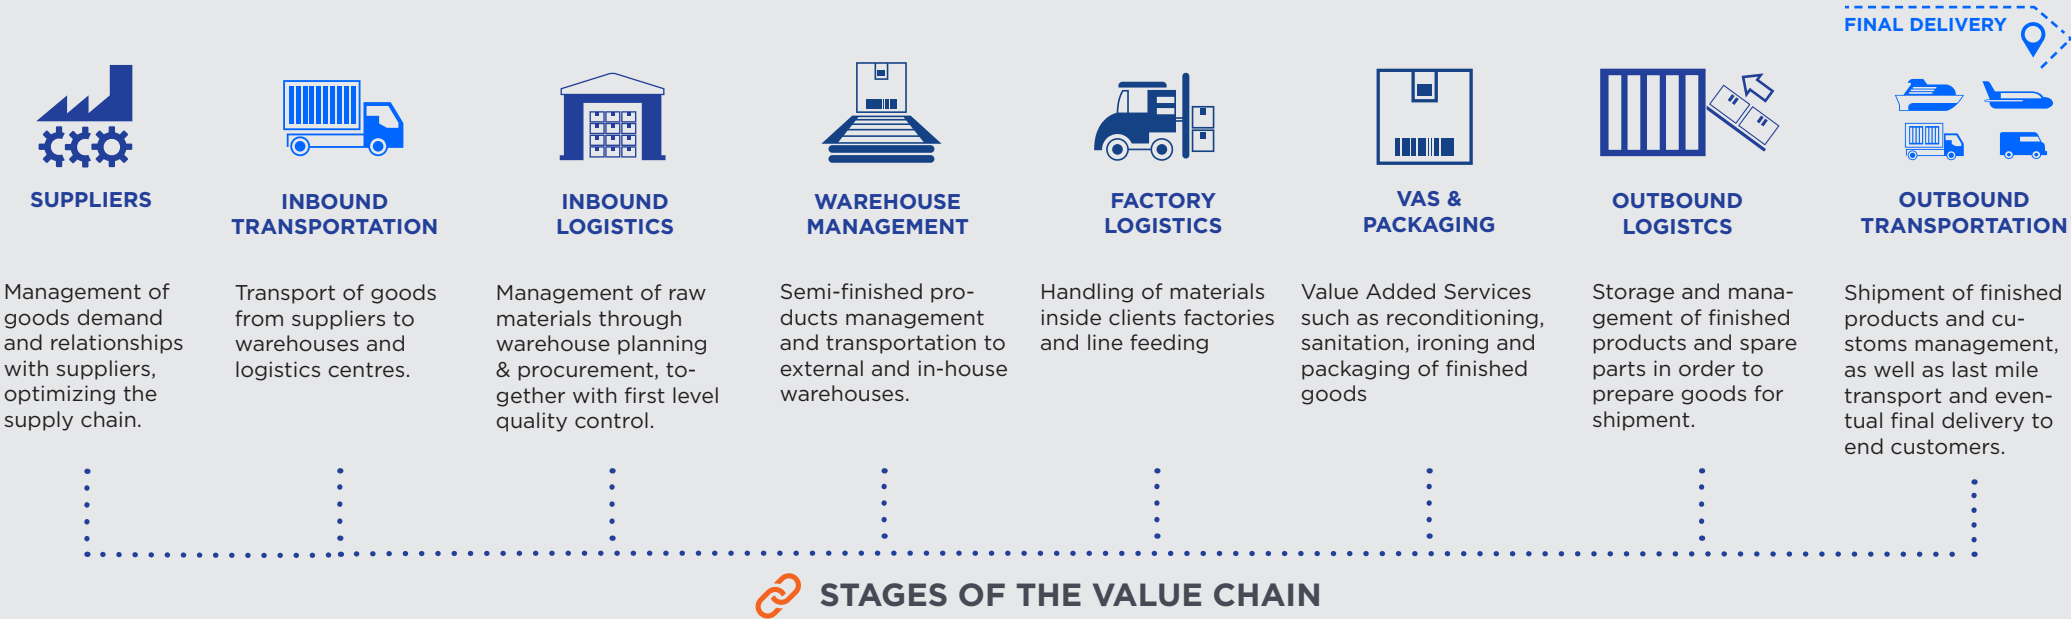

SOME OF THE COMPETENCIES OF OUR CONTROL TOWER

- Operational management
- Delivery planning
- Point of contact for final recipients
- Organization of urgent services
- Anomaly and claim management
- Customs operations management
- Support in handling administrative tasks
- Support in tracking management

A LEADING GROUP IN SPECIAL & HEAVY TRANSPORT IS BORN

Since August 2024, **Mateco S.p.A.**, a long-established company specializing in exceptional transport, has joined the Bracchi Group. In 2026, **Rostock Trans** also becomes part of the Bracchi Group, a German company specialized in heavy and complex transport, with a strong focus on the wind energy sector.

ROAD TRACTORS 4X2, 6X2, 8X4

Fleet composed of standard and **heavy-haul tractor units.**

MODULAR TRAILERS AND SEMI-TRAILERS

Semi-trailers of various types for standard heavy haulage, and modular trailers and semi-trailers with **up to 100 axle lines.**

LOWBED TRAILERS AND KESSELBRUCK

Lowbed trailers and Kesselbruck units for **heavy, overheight** transport operations.

HEAVY DUTY MODULAR VEHICLES

Self-propelled **modular platforms** for handling extremely heavy loads.

TECHNICAL DESIGN AND CONSULTING OFFICE

We deliver turnkey solutions designed to handle oversized and heavy loads, ensuring safety, efficiency and **full regulatory compliance.**

With a team of specialised engineers and consultants, we support our clients throughout every phase of the project. From preliminary analysis and route planning to **permit management and on-site operational coordination.**

EQUIPMENT TO HANDLE ANY LOAD

➤ POWER PACKS

➤ SLIDING TRACKS

➤ HYDRAULIC JACKS

➤ HYDRAULIC GANTRIES

INTERCONTINENTAL TRANSPORT PLANNING

Constant attention to every stage of the transport: from planning, packing supply, to custom/document consultancy and delivery tracking. In this way we ensure the maximum control of the goods during the shipment to the client, also in case of ADR transport.

INTERNAL CUSTOM OFFICE

We assist the client during document compilation for Import and Export shipments and for further requested services: insurance, fumigation, Cargo Waiver emission or various certifications, CCIAA or Consolari included.

COMPLETION OF CUSTOM PROCEDURES

TAX AND CUSTOM CONSULTANCY

IMPORT / EXPORT / TRANSIT CUSTOM OPERATIONS

CONTINUOUS TRAINING

IATA DGR - IMDG CERTIFICATIONS

IATA DGR certification for air transport and **IMDG certification** for ship transport enable our experts to operate in compliance with the technical and operational ADR freight regulations and keep us up-to-date with regulatory standards.

Logistics and Transport for the Beauty and Cosmetics Sector

We provide dedicated transport and logistics services for the beauty industry, offering daily shuttles and both standard and integrated solutions tailored to each client's specific needs.

In our specialised warehouses we manage the entire supply chain, from raw materials to finished products, overseeing collection, assembly, picking and order preparation for both B2B and e-commerce channels.

- **Inbound logistics:** from receiving raw materials to positioning them in the warehouse.
- **Storage and placement:** flexible and secure solutions for every type of product.
- **Order receipt and management:** digitalised systems that ensure accuracy and speed.
- **Picking and packing:** optimised processes designed to speed up order preparation.
- **Returns management and reverse logistics:** effective solutions that reduce costs and shorten return handling times.
- **High standards of safety, traceability and sustainability,** supported by certified processes and a strong focus on product integrity.

We support companies in the electromechanical sector with comprehensive, **tailor-made logistics solutions**. We manage the entire supply chain, from inbound logistics to storage and packaging, through to transport and distribution of finished products.

We handle both small components and large, complex systems. For specific requirements, we provide special and exceptional transport services with **dedicated vehicles**, authorised escorts and unloading operations using cranes or truck-mounted cranes owned by our company.

Inbound and outbound logistics

We coordinate the entire chain: material receipt and handling, storage and shipping, from small components to the most bulky machinery.

Integrated warehouse solutions

Storage, picking and packaging in dedicated facilities, set-up of operational lines and optimisation of layouts to ensure fast and safe flows.

Production line optimisation

We support clients in implementing just-in-time processes, cross-docking or kanban management to reduce waiting times and enhance efficiency.

Digital systems and automation

We use WMS, advanced ICT solutions and automated technologies to increase efficiency, reduce errors and optimise inventory levels.

OUR RANGE OF SERVICES INCLUDES:

➤ STORAGE AND WAREHOUSING MANAGEMENT

➤ LABELING BY COUNTRY OF DESTINATION

➤ SEALS POSITIONING

➤ PACKAGING AND PADDING

➤ CUSTOMIZED PROCESSING ON REQUEST

➤ ORDER PREPARATION AND SHIPPING

➤ CAPILLARY DISTRIBUTION

➤ TRACKING ORDERS TO FINAL DESTINATION

AUTOMATED WAREHOUSE

High-density racking served by Pallet Shuttles, enabling the automated management of over 3,000 wine pallets.

ADVANTAGES

1. HIGH STORAGE CAPACITY
2. OPTIMISATION OF SURFACE AREA
3. FAST OPERATING CYCLE

TAX DEPOSIT FOR THE BEVERAGE SECTOR

In order to offer a complete service, we have warehouses used as a tax warehouse for alcohol under suspension of excise duties, where we manage customs procedures, payment of excise duties and application of State markings.

PRODUCTION LINE OPTIMISATION

Our logistics managers provide comprehensive support for any logistics project, from highly manual and craft-based processes to fully automated solutions that combine WMS software with technologically advanced storage systems.

- DEFINING THE LOGISTICS STRATEGY
- OPTIMISING WAREHOUSE ORGANISATION
- STRUCTURING THE DISTRIBUTION NETWORK

LOGISTICS CONSULTING

Our team of logistics engineers is available to provide dedicated consulting services, working closely with clients to design the most effective strategy for optimising the entire corporate supply chain.

CUSTOMISED PACKAGING

We enable our customers to choose the ideal packaging for each specific product, ensuring safety and a professional presentation throughout transport:

- PROTECTION OF GOODS
- COMBINING MULTIPLE ITEMS IN A SINGLE PACKAGE
- AESTHETIC AND MARKETING REQUIREMENTS
- SPECIAL SHAPES AND DIMENSIONS

AUTOMATED PARCEL SORTER

In the warehouse in Castrezzato we have an automated portion for sorting goods. A parcel sorting system that represents the best technology on the market today for those involved in logistics.

500 parcels/hour processed.

PALLET SCAN SYSTEM

The Oppeano warehouse is equipped with an innovative automatic and electronic Pallet Scan system to solve and speed up package measurement operations.

A camera captures a digital photo of the pallet.

PALLET SHUTTLE

Our warehouses in Bassano del Grappa, is equipped with a semi-automatic Pallet Shuttle system. A solution suitable for handling large volumes of pallets per reference with intensive loading and unloading.

It is operated using tablets with a Wi-Fi connection.

TUNNEL FINISHER

In our warehouse in Tombolo we offer an exclusive industrial ironing service. Thanks to a special 4-chamber tunnel finisher, garments are ironed and reconditioned with a sanitising and deodorising treatment.

Up to 25,000 garments treated per day

AUTOMATIC WRAPPING MACHINE

The warehouse in Lonigo is equipped with an automatic wrapping machine with a rotating arm for wrapping palletised loads with stretch film, which is particularly suitable for use in sectors where high production rates are required.

SUPPLY CHAIN MANAGEMENT

Logistics technologies enable our engineers to properly manage the entire distribution chain by:

- **STATE-OF-THE-ART SOFTWARE**
- **MINIMISE WASTE**
- **CO-ORDINATE ALL ACTIVITIES**
- **DIGITALISING LOGISTICS PROCEDURES**
- **INTEGRATE AS MUCH DATA AS POSSIBLE**
